## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- Group I, claims 1, 40-43, drawn to an apparatus and method for performing wireless communication systems using a broadcast mode and a localcast mode, classified in class 455, subclass 552.
- Group II, claims 2-11, drawn to a localcast transmitter details, classified in class 455, subclasses 550, 575, 7.
- Group III, claims 12-19 drawn to a broadcast transmitter details, classified in class 455, subclasses 550, 561, 575.
- Group IV, claims 20-29 drawn to a mobile device details, classified in class 455, subclasses 550, 575.
- Group V, claims 30-33, drawn to a method for rebroadcasting data over an FM subcarriers, classified in class 455, subclasses 7, 45.
- Group VI, claims 34-39, drawn to a method for encoding and transmitting a data stream, classified in class 455, subclasses 42, 205.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions of Group I (1, 40-43), Group II (claims 2-11), Group III (claims 12-19), Group IV (claims 2-29), Group V (claims 30-33), and Group VI (claims 34-39) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as a localcast transmitter interfaces with components such as

Serial Number: 10/044,294 Page 3

Art Unit: 2685

an encoder and a packet assembler details, invention of Group III has separate utility such as a broadcast transmitter interfaces with components such as a precision time base 1-ppm oscillator, a subcarrier generator and a field-programmable gate array, invention of Group IV has separate utility such as a mobile transceiver interfaces with a real-time component and can operate in a direct or repeater mode, invention of Group V has separate utility such as rebroadcasting a received data with a local format, invention of Group VI has separate utility such as encoding and transmitting a data stream requiring low-latency transmission time. See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Serial Number: 10/044,294 Page 4

Art Unit: 2685

Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for formal communications intended for entry)

(for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington VA, Sixth Floor (Receptionist).

Any inquiry concerning this communication or communications from the examiner should be directed to Duc M. Nguyen whose telephone number is (703) 306-4531, Monday-Thursday. Or to Edward Urban (Supervisor) whose telephone number is (703) 305-4385.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-4700.

Duc M. Nguyen
